A Study of extrovert scale between English school Students And Marathi school Student's in Latur

Mr.Chandoba R. Suryawanshi
Jijamata Jr. college MIDC,Latur

Introduction:

Extrovert is a marvellously intricate structure, delicately woven of motives, emotions, habits and thoughts into a pattern that places the pulls and pushes of the outside world, It is the totality of his being and includes his physical mental emotional and temperamental make up. His experience perception, memory, imagination instincts, habits, thoughts and sense at time constitute his personality. Therefore personality differences are inevitable, as to individuals can not possess similar personality traits. Personality traits are basic to sport excellence. It is necessary to identify and cultivate those personality traits which are most conducive to the performance in sports. Hence personality is an important psychological factor which to a great extent determines the result of new athletic output.

Objective:

The main purpose of the study was to compare the extrovert between English school students and Marathi school students In Latur.

Hypothesis:

There will significant differences in extrovert between English school students and Marathi school students In Latur.

Sample

A sample of subject consisting 120 English school student & 120 Marathi school students who appeared 10th class in various schools from latur city. Sample as subjected from student for randomly selected.

Tools of the Study:

Eysenck Personality inventory was used to assess the respective extrovert scale

Statistical procedure :

The data attained from inventory were statically treated using Mean, S.D, and 't' Test

Result:**Table No. 1****Comparison of extrovert Scale for English and Marathi high school students.**

Variables	Student's	N	Mean	S.D.	't' ratio
Extrovert	Marathi Student	120	11.03	2.24	2.68*
	English Student	120	11.07	1.63	

*0.05 significant Level

Findings:

From the result it was found that with regard to extrovert of English student and Marathi student they have obtained the mean values of 11.07 and 11.03 respectively which are given in table no.1 reveals that the significant difference was found in ('t'=2.68, P<0.5) English school student having more extrovert scale tendency as compared Marathi high school student which means that Marathi students in cure significantly less extrovert tendency.

Conclusion:-

Extrovert scale also encourage an Students have studying to take up some personality development which will develop a trait in which he is thought to be lacking for example to include virtual of patience he may be encouraged to take part in soft skill liked.

In almost every sports Student will shows a degree of appetuded that will justify and ambition to purse that sport at its highest competitive level. This ambition can be of great importance as it lead enables them to avoide frustration and can lead to achievement that contributes considerly in the formation of a self ditermind and self sufficient personality.
