A comparison for self-concept between kabbadi and Kho-Kho Players in Nanded District

Dr. Sikandar N. Desaie
Deglur College, Deglur.

Self-concept is the total of an individual’s belief about his or her own personal attributes. Thus, self-concept is the set of ideas that a person has about himself. These ideas run through all his emotional experiences, habits, memories, trades and values. It refers to an attitudinal structure, which tends to be self-sustaining. An individual’s evaluation of self-concept as dominant or submissive, emotional or calm, social or exclusive will be dependent to some extent upon the group with which consciously or unconsciously he/she compares himself/herself. No one is born with a fully framed self-concept. It develops as we experience approval and criticism, success and failure. It goes with our family, our friends, our place in society, and out perception of the world around us, it is modified as our bodies mature and we evaluate our physical, social and emotional characteristics.

Statement of Research :-
