Introduction:
In sports field taking drug or doping affects the sportsman and his performance. It is considered as illegal and it is also a violent behavior. It is destructive and anti-social. Nowadays using drugs is very common among athletes. This should be discouraged. It is now fact that drug in greater quantity is harmful or fatal. So it should be not used without consultation of team doctors or by neutral physician.

Meaning of Doping
“Generally the Meaning of Doping is “use of ergogenic aid” Before competition or in competition increase a mental & physical capacity And increase a performance athletes use a ergogenic aid that’s call Doping” This is a serious problem, Doping is to improve the physical as well as mental side of the sportsmen. They are highly motivated to win, they think that cretin drugs may help them to win and the Athlete are risk possible deleterious side effects.
