Abstract

In the modern edge of business E-commerce plays an important role in day to day life. E-commerce is the process of buying and selling of goods and services through the internet. “E-commerce is also known as Electronic Commerce as well as Internet commerce. This paper is discussed about E-commerce and its applications.

E-commerce and its applications had become unavoidable factors in our day today life. E-commerce plays a vital role in the various fields such as hospitality, banking manufacturing, share marketing, etc. E-commerce helps us to buy and sell products and services at a large scale and with facility of 24*7 transaction. E-commerce venture also have a physical presence. This is better known as a click and mortar store. In this paper we are studying E-commerce and its applications.

Keywords: E-commerce, internet, buying, selling, applications

Introduction

E-commerce is sharing business information, maintaining business relationships and conducting business transactions by means of telecommunications networks’. (Vladimir Zwass 2001) E-commerce popularity increased over last decade hugely. Enables us to purchase the goods and services at global scale. E-commerce performed online retail wholesale as well as electronic transactions.

E-commerce saves the time of people by purchasing the product by sitting at home and on one click. It is a 24*7 open shop.

The history of E-commerce started firstly on 11 August 1994 where a man sold his friend a CD by band sting through his net market website, on an American retail platform. This is the first example of online purchasing goods from internet and since then it becomes easier to purchase and sale goods.

E-commerce makes use of various new technologies such as M-commerce means Mobile commerce, EDI means Electronic Data Interchange, inventory management system, Electronic Fund Transfer, etc.
