Abstract

Meditation provides mental relation is very much necessary to produce the desired results. Meditation provides a lasting spiritual rest, which must be experienced and to be understood. Meditation helps to prolong the body’s period of growth and cell production, and reduces the decaying process. Meditation is the act of focusing one’s thoughts or engaging in self – reflection or contemplation. Some people believe that, through deep meditation, one can influence or control physical and psychological functioning and the course of illness.

Introduction

Meditation is a distinct practice in Indian philosophy and it is mentioned in many Indian traditional texts. Meditation is a process that anyone can use to calm oneself, cope with stress, and, for those with spiritual inclinations. Meditation is the necessity of spiritual and moral remediation of the society. Everybody accepts the importance of meditation as a base for health of body and mind. It is very important to exercise the mind and body together. As well all know that India is a country of various caste and creeds. In order to achieve higher degree of unity in diversity.

Research interest on meditation back to the 1960s, the breakthrough in the scientific evidence on health benefits of meditation largely took place during the 1980s and 1990s. Meditation is a state of consciousness that can be understood only on a direct, intuitive level. Ordinary experiences are limited by time, space, and the laws of causality, but the meditative state transcends all boundaries. Meditation, one slowly gains knowledge of the self, and gets freed from bondages, not merely the external ones, but in one’s inner consciousness. Meditation is a process that anyone can use to calm oneself, cope with stress, and, for those with spiritual inclinations, Meditation is the act of focusing one’s thoughts or engaging in self – reflection or contemplation. Some people believe that, through deep meditation, one can influence or control physical and psychological functioning and the course of illness. For effective practice of meditation, regularity of time, place, and practice are most important, as they condition the mind to focus its energies. The mind seems to be particularly active.
